Re: 4/22/2015 Olympic Poll Methodology

---

The survey, conducted from random sample of 804 Massachusetts registered voters, with an oversampling of the city of Boston. In total, there were 400 respondents residing in Boston and 404 respondents outside of Boston. The survey was sponsored by the Boston Globe.

The survey was run over the course of two days, from 4/22/2015 to 4/23/2015 by live telephone interview, using both landlines and cellphones. The margin of error for the poll is +/- 3.46% at 95% confidence and the margin of error for the Boston subset is +/- 4.9% at 95% confidence. The data is presented unweighted.
